Subject: data graphs regarding Gold King release event

Richard et al.

Dan Wall has asked me to send you the most recent set of graphs we have prepared to display the surface water and sediment data collected in association with the Gold King release event.

Included as attachments to this e-mail are:

- 1) “SW and Sediment data 08-18-15 updated v4.xlsx”. This file presents graphs that compare post release values in surface water and sediment with pre-release (“background”) values collected before the release
- 2) “SW Rotary park Time Series.xlsx”. This file plots surface water data collected at the Rotary Park station as a function of time, beginning just before the plume arrived and extending out several days thereafter.
- 3) “Water background levels R1.xlsx” and “Sediment BackgroundR1.xlsx”. These two files were sent to me by Weston. We do not have the raw data. If you need to see the raw data for background, I suggest you contact Jan Christner at Weston (Jan.Christner@WestonSolutions.com), who does have these data available.

ps...Dan asked me to include a fourth individual, Erin Erdiales, but apparently I got the spelling wrong because I could not locate the e-mail for this person on EPA Locator. Please forward.
